

KO eHEALTH Facilitated Services

All KO eHealth Clinical referrals and subsequent physician consults are carried via dedicated and secure network connections.

Patient confidentiality is the law, and the entire KO eHealth-facilitated service model and network have been designed and created to ensure privacy.

Between 2008 – 2012, KO eHealth facilitated and carried more than 26,000 events (18,589 clinical services and 8,081 health education and administrative events) including clinical consultations, educational events, and social development project sessions. More than 400 unique health professionals have participated.

In 2011 – 2012 KO eHealth managed and enabled 3,849 clinical services and coordinated 1,196 health education and administrative events. Fewer than 1 % of all patients refused telemedicine services, and one in every 13 people living in a KO eHealth-affiliated First Nation used telemedicine in 2011-2012; Ontario-wide, that figure rises to one in every 64 people.

KO Telemedicine transforming the way you receive health care.

Tele-Consults Facilitated Clinical Services
